

The Dust Up 2015

Dear Participant,

The 2015 Dust Up will use standard Ephrata Turnpoints and SUA (Special Use Airspace) definitions. You can find these online at the Worldwide Soaring Turnpoint Exchange.

Here are links to those file areas – you must pick the proper data format for your Logger/PDA:

- <http://soaringweb.org/TP/Ephrata/files.html>
NOTE: Contests often use numbers to ensure proper identification of turnpoints. Therefore we recommend you download one of the files described as having “[control point number before name]” or “[control point number after name]”.

You should download the files and test them in your equipment **before** you arrive at Ephrata for the Dust Up!

- Maps of the contest area:
[Here's an Interactive Google Map](#)
[This a collection](#) you can open with Google Earth
[There's also a basic layout of the turnpoints](#) relative to each other

If you have questions about which files to use, please consult your Hardware/Software manuals. If you have difficulties in obtaining or using the Ephrata turnpoint files from the Turnpoint Exchange, please feel free to contact us and we'll attempt to help.
